Notice: POLICY MANUAL UPDATES

This Program Policy Manual for the Master of Science in Physician Assistant Studies (MSPAS) contains policies and procedures unique to the MSPAS program and is distributed initially to students as they begin the first professional year. Updated versions of this Policy Manual may be provided during a student’s enrollment in the program, and the most recent Policy Manual will supersede all previously distributed versions. Where no specific MSPAS program policy exists, students are to consult the general guidelines of the Adventist University Student Handbook. The MSPAS program reserves the right to update this Policy Manual without prior notice. In the event of an update without prior notice, all matriculated students will be provided with a written copy of any updated policies. A student’s continuation in the MSPAS program will be contingent upon submission of a signed and dated ‘Receipt and Acknowledgement’ form for the most recent update of the Policy Manual.

Version: updated 10/2017
PART I: GENERAL POLICIES AND PROCEDURES

Welcome to the Department of Physician Assistant Studies at Adventist University!

We are pleased that you have chosen to join us for your education and we look forward to working with you to help achieve your professional goals.

This manual is designed to serve as a supplement to other University publications such as the Student Handbook and the Adventist University Graduate Catalog. It will provide you with important information as you progress through your studies.
INTRODUCTION

WELCOME

On behalf of Adventist University and the faculty and staff of the Physician Assistant program, I would like to welcome you. We want to thank you for considering us in your education and career plans and appreciate you joining us. We believe you will find this a very beneficial and rewarding experience.

You are beginning your educational journey at a momentous time in the history of the Physician Assistant profession. 2015 marks the 50th anniversary since Eugene A. Stead, Jr., M.D. and Duke University announced the inaugural PA program and accepted 4 former Navy corpsmen for a unique educational and training experience. We would like to think that you, as a member of the inaugural class in the PA program here at ADU, will likewise embark on a new exciting and unique experience.

While this program will undoubtedly prove to be very challenging we as the faculty and staff want you to know that we are committed to your success. We will make ourselves available to you for any questions, concerns or assistance you may need. Together we will forge a path of success in your education and subsequent career as a PA.

Again, welcome to ADU and to the PA program. We look forward to our journey ahead with each of you. May God bless you in your future endeavors.

Sincerely,

Mark Payne, DHSc, PA-C, DFAAPA
Department Chair/Program Director
PROGRAM ACCREDITATION

STANDARD A3.02 The program must inform students of program policies and practices.

ARC-PA Accreditation Status

At its July 2017 meeting, the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) placed the Adventist University of Health Sciences Physician Assistant program, sponsored by Adventist University of Health Sciences, on Accreditation-Probation status until its next review in June 2019.

Probation is a temporary status of accreditation conferred when a program does not meet the Standards and when the capability of the program to provide an acceptable educational experience for its students is threatened.

Once placed on probation, programs that still fail to comply with accreditation requirements in a timely manner, as specified by the ARC-PA, may be scheduled for a focused site visit and/or risk having their accreditation withdrawn.

Specific questions regarding the Program and its plans should be directed to the Program Director at pa.info@adu.edu and/or the appropriate institutional official(s).

ADU Explanation

The Adventist University of Health Sciences (ADU) Physician Assistant program has been, and remains, accredited. ADU is also accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award Certificates, Associate's, Baccalaureate's, Master's, and a Doctoral degree. As such, the pursuit of academic excellence continues to be the primary objective of the program faculty and the University administration.

The reasons for placing ADU on accreditation probation status pertains to administrative and assessment standards. While we are disappointed with the probationary status, students will be reassured to know:

- The content and quality of the curricular instruction is not in question.
- This does not affect currently enrolled, admitted, and prospective students on their journey toward program completion.
- Students can continue to apply, matriculate, graduate, take board examinations, obtain state licensing, and practice medicine.

The program and University administration have initiated an intensive plan of action to immediately address the accreditors’ concerns. We are confident that the corrective measures being implemented will meet or exceed the accreditation standards of the ARC-PA ultimately lifting the probationary status.

Additional questions may be directed to me at pa.info@adu.edu.
This policy manual is in part based on the 4th edition Accreditation Standards for Physician Assistant Education, published in September 2013. The Standards will be referenced throughout the manual, as they inform and guide the curriculum, policies and procedures adopted by the MSPAS program. The Standards constitute the requirements to which an accredited program is held accountable and provide the basis on which the ARC-PA will confer or deny program accreditation. According to the ARC-PA, “these Standards were initially adopted in 1971 and were revised in 1978, 1985, 1990, 1997, 2000, 2005, 2010, and 2013.

ARC-PA commissioners include individuals nominated from the collaborating organizations of the ARC-PA, which include:

American Academy of Family Physicians
American Academy of Pediatrics
American Academy of Physician Assistants
American College of Physicians
American College of Surgeons
American Medical Association
Physician Assistant Education Association

The collaborating organizations cooperate with the ARC-PA to establish, maintain, and promote appropriate standards of quality for entry level education of PAs and to provide recognition for educational programs that meet the requirements outlined in the Standards. These Standards are used for the development, evaluation, and self-analysis of PA programs.

Physician assistants are academically and clinically prepared to practice medicine under the direction and responsible supervision of a doctor of medicine or osteopathic medicine. The physician-PA team relationship is fundamental to the PA profession and enhances the delivery of high-quality health care. Within the physician-PA relationship, PAs make clinical decisions and provide a broad range of diagnostic, therapeutic, preventive, and health maintenance services. The clinical role of PAs includes primary and specialty care in medical and surgical practice settings. PA practice is focused on patient care and may include educational, research, and administrative activities.

“The role of the Physician Assistant demands intelligence, sound judgment, intellectual honesty, appropriate interpersonal skills, and the capability to react to emergencies in a calm and reasoned manner. An attitude of respect for self and others, adherence to the concepts of privilege and confidentiality in communicating with patients, and a commitment to the patient’s welfare are essential attributes of the graduated PA. The professional curriculum for PA education includes basic medical, behavioral, and social sciences; introduction to clinical medicine and patient assessment; supervised clinical practice; and health policy and professional practice issues.

“The Standards recognize the continuing evolution of the PA profession and practice and endorse experiential competency-based education as a fundamental tenet of PA education. While acknowledging the interests of the sponsoring institution as it works with the program
to meet the *Standards*, the *Standards* reflect a determination that a commonality in the core professional curriculum of programs remains desirable and necessary to offer curricula of sufficient depth and breadth to prepare all PA graduates for practice. The *Standards* allow programs to remain creative and innovative in program design and the methods of curriculum delivery and evaluation used to enable students to achieve program goals and student learning outcomes. Mastery of learning outcomes is key to preparing students for entry into clinical practice.

“The PA profession has evolved over time to one requiring a high level of academic rigor. Institutions that sponsor PA programs are expected to incorporate this higher level of academic rigor into their programs and award an appropriate master’s degree. The ARC-PA acknowledges ongoing changes in the delivery of health care and in the education of health professionals.”

- Accreditation Standards for Physician Assistant Education, 4th Edition

**PROGRAM SPONSORSHIP AND PHILOSOPHY**

Adventist University anticipates accepting the first class of PA students in the MSPAS program in May of 2015.

The mission statement of the MSPAS Program was developed in January 2014 to reflect program outcomes, the developing curriculum, and vision of the founding program director and medical director, and the Academic Dean. As demonstrated below, the program mission statement reflects the underlying university mission statement.

*University Mission Statement*

Adventist University of Health Sciences, a Seventh-day Adventist institution, specializes in the education of professionals in healthcare. Service-oriented and guided by the values of nurture, excellence, spirituality, and stewardship, the University seeks to develop leaders who will practice healthcare as a ministry.

Vision Statements

The four words and their accompanying definitions are an identification and explanation of the values underlying the University Mission Statement. They play a vital role in the fulfillment of this Mission.
NURTURE
ADU will be an institution that encourages the personal and professional growth of its students, faculty, and staff by nourishing their spiritual development, fostering their self-understanding, and encouraging a zeal for knowledge and service.

EXCELLENCE
ADU will be an institution whose programs are built upon an optimal blend of superior pedagogy, technology, and spiritual values; a blend designed to lead to the highest level of professional practice by its graduates.

SPIRITUALITY
ADU will be an institution where Christian professionalism is such an integral part of its programs and practices that it becomes the distinguishing characteristic of the organization.

STEWARDSHIP
ADU will be an institution where the wise stewardship of its human, intellectual, financial, and physical resources enables the University to achieve outcomes consistent with its mission.

Program Mission Statement
The Physician Assistant program seeks to educate individuals who desire to become knowledgeable, compassionate and spiritually uplifting healthcare providers. Whether they practice locally, nationally or globally, it is the intent of this program to graduate individuals who embrace a mission of service to others.

Vision statement:
The Physician Assistant program fully embraces the Universities concept of nurture, excellence, spirituality and stewardship. These concepts are the embodiment of our mission and goal for our program and our graduates.
GOALS OF THE PHYSICIAN ASSISTANT PROGRAM

Upon completion of the program graduates will exhibit:

1. Proficiency in obtaining a thorough medical history and performance of a complete physical examination.

2. Effective communication with fellow healthcare team members, family members and patients.

3. The ability to care and demonstrate compassion and understanding while being supportive and willing to provide superior patient care.

4. A functional understanding of disease processes and injuries and be able to form appropriate differential and final diagnoses.

5. Appropriate utilization and interpretation of medical diagnostics.

6. The capacity and ability to apply critical thinking into the evaluation and care of patients.

7. Basic knowledge of research designs and statistical methods and apply them to critical appraisal of scientific studies to enhance the graduate’s ability to diagnose and treat patients.

8. The ability to conduct one’s self in an ethical and moral manner.

9. The capacity to address the spiritual needs of patients.

10. Responsible and understanding behavior regarding social, community and environmental mores.

12. The ability to pursue appropriate steps toward board certification, licensure and employment as a Physician Assistant.

13. Integrate diagnostic assessment skills with knowledge of patient presentation, pharmacology and health care subspecialties to synthesize appropriate treatment plans.
DEPARTMENT FACULTY & STAFF

STANDARD A1.04 The sponsoring institution must provide the opportunity for continuing professional development of the Program Director and principal faculty by supporting the development of their clinical, teaching, scholarly and administrative skills.

STANDARD A2.01 All faculty must possess the educational and experiential qualifications to perform their assigned duties.

STANDARD A2.13 Instructional faculty must be: qualified through academic preparation and/or experience to teach assigned subjects and knowledgeable in course content and effective in teaching assigned subjects.

STANDARD A2.14 In addition to the principal faculty, there must be sufficient instructional faculty to provide students with the necessary attention, instruction and supervised clinical practice experiences to acquire the knowledge and competence required for entry into the profession.

The faculty and staff of the PA Program at Adventist University welcome you. It is our collective intent to provide each student with a well-rounded quality education. The faculty has been selected specifically for their experience and expertise in their respective fields. We are dedicated to your success and look forward to the opportunity to interact with each of you throughout your educational journey.

PROGRAM DIRECTOR

Mark Payne, DHSc, PA-C, DFAAPA

The program director is responsible for the oversight and operation of the PA program. The director participates in the development of the didactic and clinical aspects of the program as well as being responsible for the faculty and staff. The position also encompasses participation in management level committees within the University.

Dr. Payne practiced Emergency Medicine for over 28 years. He began his career in healthcare as an EMT, eventually becoming a Paramedic and working in the field for 6 years. Interaction with Physician Assistants at local Emergency Departments and hospitals led to a fascination with and determination to become a PA. He graduated from the PA program at Kettering College in 1988. Dr. Payne holds a Master of Science in Physician Assistant Studies from AT Still University, a Master of Arts in Emergency and Disaster Management from American Military University and a Doctor of Health Sciences, with a concentration in Advanced Physician Assistant Studies, from AT Still University.
MEDICAL DIRECTOR

Ann Marie LeVine, M.D.

The medical director is responsible for ensuring that the didactic and clinical components of the PA program meet the recommended ARC-PA standards. Further the medical director participates in candidate interviews and other special events within the program.

Dr. Ann Marie LeVine is a pediatric critical care specialist with over 25 years of experience. She served as pediatric critical care fellowship director for 8 years. She has trained medical students, pediatric residents, pediatric critical care fellows and postdoctoral research fellows. In addition, she had an active basic science lab with NIH funding. The focus of the research was lung injury and disease with an emphasis on the surfactant system of the lung. She was actively involved in the American Lung Association serving on committees, developing symposia for the annual meeting and reviewing grants. It is with great enthusiasm that she joins the faculty of Adventist University of Health Sciences.

PRINCIPAL FACULTY

Academic Director
Cherilyn Hendrix, DHEd, MSBME, PA-C

The Academic Director is responsible for all curriculum and didactic components of the Physician Assistant program. It is the responsibility of the Academic Director to maintain that all course content meets the requirements of the ARC-PA standards. The Academic Director also oversees all instructional and adjunct faculty within the program.

Dr. Hendrix has had a distinguished career in engineering, education, and as a Physician Assistant. She received her Associate of Arts and Associate of Science degree in Engineering Technology from Brevard Community College, a Bachelor of Science in Liberal Arts from the State University of New York and a Master of Science in Engineering and Applied Physics of Biomedicine from Johns Hopkins University. She graduated from the Physician Assistant program at Anne Arundel Community College in Arnold Maryland and received her Doctor of Health Education Degree from AT Still University. Dr. Hendrix also graduated from the postgraduate PA surgical residency at Duke University.

Dr. Hendrix has taught engineering at Johns Hopkins University and has taught in the Physician Assistant program at Anne Arundel Community College as well as at Nova Southeastern University. She was also an adjunct instructor in the postgraduate PA surgical residency at Duke University. Dr. Hendrix has published several peer-reviewed journal articles and holds four US patents.
**Clinical Director**
Edgar Jimenez, M.D.

Dr. Jimenez graduated with a Bachelor of Arts in Chemistry from Southern Missionary College in Collegedale, Tennessee. He received his Doctor of Medicine from the University of South Florida in Tampa, Florida. After a Rotating Internship in Greenville, South Carolina he practiced Emergency Medicine for two years returning to complete his Obstetrics and Gynecology residency in Greenville, South Carolina. He practiced medicine in Western North Carolina and Orlando, Florida for approximately twenty years retiring in 2006. He joined the Physician Assistant program at ADU as Clinical Director in November 2015.

Patrick Sherman, DSc, MHS, APA, PA-C

Dr. Sherman received his Bachelor of Science degree from The Citadel, The Military College of SC in Charleston, South Carolina in 1985 and was commissioned as a Cavalry Officer (Second Lieutenant) in the United States Army. He received his Physician Assistant and Masters in Health Science from Quinnipiac University in 1997. He completed his Doctorate of Science, Physician Assistant General Surgery from Baylor University in 2014.

Dr. Sherman has over 32 years of Active, Reserve and National Guard duty serving as a Cavalry, Infantry and Medical Officer. He completed four combat tours in Iraq and Afghanistan and has provided medical care on every continent except Antarctica. Dr. Sherman retired from active duty on 1 Aug 2017 at the rank of Lieutenant Colonel.

Dr. Sherman has held academic appointments at the University of Nebraska Medical School, The Medical University of South Carolina and the Army Medical Department Center and School.

Dr. Sherman has held numerous clinical and administrative positions culminating with serving as the Director of Comprehensive Pain Management/Medicine for the Army Surgeon General.

Dr. Sherman’s awards include the Army Surgeon General’s 9A designation as an expert in his field, The Order of Military Medical Merit, the Combat Medical Badge, The Combat Action Badge, the Legion of Merit Medal, Bronze Star Medal x 2, Defense Meritorious Service Medal, Meritorious Service Medal x 5, Army Commendation Medal x 5, Army Achievement Medal x 2. Airborne Badge, Air Assault Badge, Aeromedical Physician Assistant (flight surgeon) Badge, and Instructor training certificate.

**DEPARTMENT ADMINISTRATIVE SUPPORT**

**Department Admissions**
Lee Ann Wetmore, B.S.

Ms. Wetmore is responsible for all aspects of admissions and enrollment for the department.
Ms. Wetmore graduated from Salem State University with a Bachelor of Science in Accounting. She worked for 11 years in a large community hospital with an Emergency Medicine Physician’s Group before joining the University.

**Executive Assistant**  
Nazreen Ramtahall, B.A.

Mrs. Ramtahall is responsible for the overall office operations within the program.

Nazreen Ramtahall graduated from Ashford University with her bachelors in Business Administration. Prior to her coming to ADU she worked at Florida Hospital in various roles for the last 10 years. Her most recent role was in Human Resources. Altogether she has 25 years of professional office administration and banking experience.

**Clinical Coordinator**  
Jenicca Brown

Mrs. Brown is responsible for the daily monitoring and orchestration of the clinical phase of the program.

**CLINICAL PRECEPTORS**

You will be assigned to a clinical preceptor at each of your clinical sites while on rotation during the second year of the program. Your preceptor will set your schedule and guide you through the daily routine of each rotation.

**ADVISEMENT**

Faculty advisors will meet with students during the trimester to discuss academic progress and other issues. Students must take responsibility for their own learning and will be asked to self-evaluate their progress by filling out the Mid-Trimester Advisement Sheet (see Appendix C) prior to meeting with their advisor. Mid-Trimester evaluations will be placed in student files. Students with academic concerns should address the issue first with the course instructor. Should a student require further assistance, he/she should consult with the faculty advisor. The advisor will involve the Program Director or other University administrative personnel as the situation warrants.

Your advisor will assist you in identifying areas of strength and weakness to help you focus your studies. When problems arise, your advisor will discuss them with you to clarify your options and devise a plan of action.
Your advisor is not able to act as a medical provider for you. If you have a medical problem, you should seek assistance from student health services or another provider.

Your advisor is also not able to act as a mental health counselor for you. If you have nonacademic problems that require formal counseling, you may go to the Center for Academic Achievement (CAA) for counseling services.

Faculty schedules tend to be unpredictable due to clinical and research obligations. If you have a non-emergent need, it is best to make an appointment with your advisor via telephone or email. If you feel your need is emergent and your faculty advisor is not available, you may contact any PA faculty or staff member for assistance.

**PROGRAM ESSENTIAL FUNCTIONS**

*Working as a medical professional is often physically, mentally, and emotionally demanding. A copy of these Standards may be found in this section and on the program website at [http://www.adu.edu/academics/physician-assistant/technical-standards](http://www.adu.edu/academics/physician-assistant/technical-standards) for your reference.*

The Adventist University MSPAS program is committed to the education of all qualified individuals, including persons with disabilities who, with or without reasonable accommodation, can perform the essential functions of the educational program in which they are enrolled and the profession that they pursue.

It is the policy of the program to comply with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act of 1973, and state and local requirements regarding students and applicants with disabilities. Under these laws, no otherwise qualified and competent individual with a disability shall be denied access to or participation in services, programs, and activities solely on the basis of the disability.

In accord with federal regulations established by the Americans With Disabilities Act, the following standards are described to assist each candidate in evaluating his/her prospect for academic and clinical success. General standards for the MSPAS program are followed by standards that apply to the professional discipline to which you have applied (see additional standards below). When a student’s ability to perform is compromised, the student must demonstrate alternative means and/or abilities to perform the essential functions described.

It is important that you read each standard carefully. Each student is given the opportunity to read and acknowledge his/her understanding of the standards prior to beginning the program.

**TECHNICAL STANDARDS, MSPAS**

A candidate for the Adventist University Master of Science in Physician Assistant Studies program must have, at a minimum, demonstrably acceptable skills in observation,
communication, motor, intellect and behavior/socialization. Reasonable accommodation for persons with documented disabilities will be considered on an individual basis, but candidates must be able to perform in an independent manner.

To qualify for admission to the Master of Science in Physician Assistant Studies program, candidates must demonstrate to program principal faculty the ability to meet the following technical standards in timed settings and under stressful conditions:

1. **Observation:** Students must be able to demonstrate sufficient capacity to observe demonstrations and experiments in basic and clinical sciences (including computer-assisted instruction), and must be able to observe a patient accurately at a distance or close at hand.

2. **Communication:** Students must be able to demonstrate sufficient capacity to communicate accurately and with clarity, in oral and written forms, with appropriate respect and sensitivity towards faculty, patients, and all members of the healthcare team.

3. **Motor:** Students must have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other diagnostic maneuvers. They must be able to grasp and manipulate tools and equipment, stand, sit, walk and move as needed in a patient care setting.

4. **Senses:** Students must have sufficient use of the senses of vision, hearing, touch, and smell necessary to directly perform a physical examination.

5. **Problem solving:** Students must demonstrate sufficient ability to learn to measure, calculate, analyze, and synthesize data to reach diagnostic, therapeutic and surgical judgments.

6. **Clinical skills:** Students must demonstrate sufficient ability to learn and perform routine laboratory tests and diagnostic, therapeutic and surgical procedures. All students will be expected to perform physical examinations on both males and females.

7. **Behavioral attributes:** Students must possess the emotional health necessary for full utilization of their intellectual abilities, the exercise of sound judgment, the prompt completion of responsibilities attendant to the diagnosis and care of patients, and the development of mature, sensitive, and effective relationships with faculty, clinical staff and patients.

8. **Judgment:** Students must be able to learn and demonstrate the ability to recognize limitations to their knowledge, skills and abilities, and to seek appropriate assistance with their identified limitations.
9. **Stability:** Students must be able to learn to respond with precise, efficient, and appropriate action in emergency situations.

10. **Perseverance:** Students are expected to possess the humility to accept criticism, and the diligence to successfully complete the physician assistant curriculum and enter the practice of medicine as a certified physician assistant.

11. **Cognition:** The physician assistant program is a concentrated and fast-paced program. In addition, physician assistants must often make critical decisions when evaluating patients and must make these decisions in a timely manner. Students must be able to assimilate large amounts of information quickly and efficiently, as well as gather and analyze patient data in a timely manner. Health conditions and/or drugs (prescription, over the counter or "recreational") that alter perceptions, slow responses, or impair judgment are not compatible with success in the program. These may also affect the student's ability to obtain a license or to practice as a physician assistant.

12. **Capability:** Physician Assistants work in a variety of clinical settings and may be required to stand for extended periods of time, assist in major surgery, hold retractors, place invasive devices, assist in labor and delivery, perform cardiopulmonary resuscitation, perform minor surgical procedures, or help move patients. Therefore, students must demonstrate sufficient capability to function safely, effectively, and efficiently in a classroom, laboratory, or clinical facility without any of the following: a surrogate, intermediate, companion (animal or human), translator, or assistive device that would interfere with or not be usable in a surgical or other patient care setting.

Individuals with disabilities may be provided reasonable accommodations to fully participate in the program, as long as their condition does not interfere with patient care or safety, or lead to a high likelihood of absenteeism.

**Professional Responsibility:** Students must exhibit the ability to meet the challenges of any medical situation that requires a readiness for immediate and appropriate response without interference of personal or medical problems. This requires training for emergencies (e.g., CPR, infection control).

It is each student’s responsibility to attend and be able to travel to and from classes and clinical assignments on time, and possess the organizational skills and stamina for performing required tasks and assignments within allotted time frames. This involves frequent oral, written, and practical examinations or demonstrations. The student must have the ability to perform problem-solving tasks in a timely manner.

Students will exhibit adherence to policies of the university, their program, and clinical sites. This includes matters ranging from professional grooming, dress, and behavior, to attending to their program’s academic schedule, which may differ from the University’s academic calendar and be subject to change at any time.
Students must demonstrate knowledge of and commitment to the code of ethics of their profession and behavior that reflects a sense of right and wrong in the helping environment. Students will take initiative to direct their own learning. They need to work cooperatively and collaboratively with other students on assigned projects, and participate willingly in a supervisory process involving evaluation of abilities and reasoning skills.

Additional standards relevant to specific discipline, Physician Assistant Program:

In addition to the general standards above, students applying to the Physician Assistant Program must consider that they will be required to:

• Participate in patient assessment and evaluation.
• Participate in invasive and non-invasive procedures.
• Participate in emergency care.
• Work lengthy and irregular hours.
• Attend and participate in didactic and clinical education training on or off campus.
• Perform physical examinations on male and female peers along with being examined by both male and female peers during laboratory instruction.

DISABILITY SERVICES

All students with a documented disability who are seeking accommodations should contact the Office for Students with Disabilities (OSD) located in the CAA at least two weeks before the beginning of the trimester or immediately following any injury or illness. This recommendation is to ensure timely implementation of accommodations.

Information on Academic Accommodations

Faculty and staff members are required to provide reasonable accommodations to all students with disabilities who have provided appropriate documentation of the disability to the Office for Students with Disabilities (OSD). Therefore, all students requesting accommodations because of a disability should be referred to the OSD. Once the request has been made, the OSD will determine eligibility for disability-related services. Students must have a documented disability as defined by the Federal Rehabilitation Act of 1973, Section 504, and/or the Americans with Disabilities Act of 1990 (ADA).

If correct documentation has been submitted and a student qualifies for accommodation, the OSD will notify each instructor by letter. The letter from the OSD explains the accommodations necessary for that student. Please keep in mind that this information is to remain confidential and discussing accommodations with a student should be done discretely. If a student talks to a class member or another faculty member, that is his or her right, but not the right of the faculty member. All students sign a Release of Information Form so that the OSD may share the information with the necessary parties.
For each trimester, it is then the student’s responsibility to notify the OSD of his or her updated class schedule, and the OSD will, in turn, notify each instructor by letter. If a faculty member feels that he or she cannot implement all the recommended accommodations, the faculty member should contact the OSD to negotiate an acceptable alternative. The alternative will then be discussed with the student by the OSD and faculty member.

Here is a statement that may be included in your syllabus:

Students seeking accommodations must first contact the Office for Students with Disabilities (OSD) located within the Center for Academic Achievement (CAA), prior to or at the beginning of the trimester.

The student must provide the OSD the requested current, official documentation related to his or her disability. That documentation will be used to determine the type and extent of accommodation that is most reasonable and effective for that student. All forms can be found online on the CAA webpage behind the student login or within the CAA department itself.

If all forms have been completed, criteria met, and accommodations granted, the OSD will then notify each of the student's instructors of the accommodations that should be provided. The processing time for these forms is approximately two weeks.

For further information regarding Academic Accommodations, please contact the CAA.

**PROFESSIONALISM**

*STANDARD C3.02 The program must document student demonstration of defined professional behaviors.*

The MSPAS Technical Standards consider the physical, cognitive, and behavioral abilities required for satisfactory completion of the physician assistant curriculum. The essential required abilities for a physician assistant student include motor, sensory, communicative, intellectual, behavioral, and social aspects. Academic, clinical, and professional development are intertwined and related to each other. A student’s growth in the academic and clinical areas may be dependent on his/her growth as a professional.

Physician assistant students must recognize themselves as clinicians providing services to both the physician supervisor as well as to the patient. PA students must be aware that, even as students, they are viewed by both patients and medical providers as part of the larger medical community. It is critical, therefore, that professional development be assessed, just as academic and clinical skills are measured, during a student’s growth.

As healthcare practitioners, physician assistants are required to conform to the highest standards of ethical and professional conduct. Physician assistant students also are expected to adhere to the same high ethical and professional standards required of physician assistants.
The American Academy of Physician Assistants (AAPA) has identified four primary bioethical principles – autonomy, beneficence, non-maleficence, and justice – that form the foundation of the Statement of Values of The Physician Assistant Profession. The Statement of Values provides a guideline for ethical conduct by physician assistants. (A complete discussion of the ethical conduct required of physician assistants can be found at the American Academy of Physician Assistant website, www.aapa.org). In addition to the AAPA’s guidelines, The National Commission on Certification of Physician Assistants (NCCPA) recently adopted a code of conduct for certified and certifying physician assistants. The NCCPA’s code of conduct “outlines principles that all certified or certifying physician assistants are expected to uphold.” A complete discussion can be found at:

In addition to understanding and complying with the principles and standards promulgated by the AAPA, the NCCPA, and the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), physician assistant students are required to know and comply with the policies, procedures, and rules of the Master of Science in Physician Assistant Studies program and the university; and the policies, procedures, and rules of each clinical site to which the student is assigned. Further, physician assistant students are required to conduct themselves in a manner that complies with the following principles and standards:

**RESPECT**

Physician assistant students are expected to treat all patients, faculty, staff, clinical preceptors, healthcare workers, and fellow students with dignity and respect. For example:

- Physician assistant students must recognize and embrace their roles as members of a team and interact with others on the team in a cooperative and considerate manner.

- Physician assistant students train closely with other students, including in physical examinations of fellow students and discussion groups that may reveal personal information. Students must maintain and exhibit respect for the privacy and confidentiality of fellow students.

- Students should offer criticism or suggestions in a thoughtful and reasoned manner that fosters respect and trust.

- When confronted with conduct by another member of the team that may be deemed inappropriate, students are not to respond angrily; rather, they must remain calm and respectful, and respond in accordance with the standards of professional conduct required of physician assistant students.
**FLEXIBILITY**

Although every effort is made to provide training activities at times and places scheduled in advance, physician assistant students often will be required to be flexible because of unavoidable changes in the schedule. For example, instructors who are also practicing clinicians may not have a regular schedule, and lectures or clinical sessions may, at times, need to be rescheduled with short notice. In addition, clinical sites create the student schedules for each rotation, and such schedules may require physician assistant students to work on weekends and nights.

**HONESTY AND TRUSTWORTHINESS**

Physician assistant students shall be honest and truthful in all respects. Students shall not intentionally mislead others.

**STUDENT ROLE AND ACCOUNTABILITY**

Physician assistant students have a unique role in health care delivery. In that role, students are accountable for such things as:

- Students shall perform only those procedures authorized by the program, clinical site, supervisor, and/or preceptor.

- Physician assistant students at clinical sites must always work under the supervision of a preceptor, and are prohibited from assuming primary responsibility for a patient’s care. For example, students shall not treat or discharge a patient without prior consultation with, and approval of, a clinical preceptor or supervisor.

- Students are responsible for timely completion of all assignments and duties effectively and to the best of their ability.

- Students are responsible for identifying and reporting unprofessional, unethical, and/or illegal behavior by healthcare professionals and students, faculty, and staff of the MSPAS program. If a physician assistant student has a reasonable belief that such conduct has occurred, he or she should report it to the Program Director, preceptor, supervisor, or faculty advisor, as may be appropriate under the circumstances.

- Physician assistant students are expected to accept and apply constructive feedback. Physician assistant students are always required to exercise sound judgment.
CONCERN FOR THE PATIENT

Physician assistant students must, by their words and behavior, demonstrate concern for the patient. Concern for the patient is manifested in many ways, including, but not limited to, the following:

• Physician assistant students must treat patients and their families with dignity and respect.

• At all times, the physical and emotional comfort of the patient are of paramount importance.

• Students must use appropriate verbal and non-verbal communication to convey concern, pleasantness, compassion, and professionalism to the patient.

• The patient’s modesty must be considered and respected at all times.

• Students shall deliver healthcare services to patients without regard to their patients’ race, religion, national origin, age, sex, marital status, citizenship, sexual orientation, creed, disability, medical condition, socioeconomic status or political beliefs, or any other belief or status protected by law.

• Students must not accept gifts or gratuities from patients or their families.

• Sexual or romantic relationships with patients are prohibited and will not be tolerated.

PROFESSIONAL APPEARANCE

Professional appearance demonstrates respect for patients and helps to build their confidence and trust. Physician assistant students must dress in professional, neat, and conservative attire. Good personal hygiene is always required and expected.

Guidelines for all Program Related Experiences (the First Professional Year)

• All students will be expected to wear conservative business casual attire
• No hats (men and women)
• No shorts, sweats or cutoff pant legs
• No midriff, or halter tops
• No body jewelry/piercing that interferes with class function, especially during laboratory sessions
• No visible tattoos
• No open-toed shoes during laboratory sessions in which sharps are handled
• Men’s facial hair must be neatly groomed
Dress requirements for physical examination laboratory sessions may be found in the appropriate course syllabus. Scrubs may be worn for Gross Anatomy Laboratory only. When required to be present at clinical sites, please observe guidelines below.

Guidelines for All Clinical Experiences (in addition to the criteria noted above)

STANDARD B3.01 PA students must be clearly identified in the clinical setting to distinguish them from physicians, medical students, and other health profession students and graduates.

• Professional dress is necessary for all clinical experiences and evening classes/meetings:
  - Students will wear a clean, short white “consultation jacket”
  - Males should wear a collared shirt with a tie
  - Hair should be worn in a neat manner – no facial hair
  - Women should wear a business dress, or dress pants/skirt and blouse ensemble
  - All attire will be clean and pressed
  - Jeans, shorts and cutoffs are prohibited
  - Open toed shoes are prohibited; sneakers are allowed when wearing scrubs only

• Students must prominently display, at all times, their identification issued from Adventist University, which contains the student’s name and the title “PA Student” (supplied by the program).

• Any additional dress requirements imposed by a clinical site supersede those of the program.

• “Scrubs” should be worn in accordance with the clinical facility policy. In general, they should not be worn outside of the operating or delivery room. Soiled scrubs should be left appropriately at the facility for laundering at the end of the assigned shift. Scrubs are not permitted on campus except as previously noted.

Students who appear in class or at a clinical site with inappropriate attire or hygiene may be directed to leave, and will not be permitted to make up missed assignments.

MAINTAINING COMPOSURE

Physician assistant students must maintain a professional and calm demeanor at all times, even in emergency and other highly stressful situations.

DRUGS AND ALCOHOL

Physician assistant students must comply with the University’s Drug and Alcohol Policy, which may be found in the University Student Handbook, and all other applicable policies and procedures concerning the use of drugs and alcohol whether on campus or at clinical sites. All
students must successfully complete a drug screen examination prior to entering the didactic phase of the program. A clinical site may request additional drug screens prior to entering their site or during the rotation. Students must comply with this request or risk failure of that clinical rotation. Students are prohibited from appearing in class or at any clinical site while under the influence of alcohol or any drug; medication, or substance that may affect performance or judgment. Drug screens are conducted at the student’s expense.

**TIMELINESS AND ATTENDANCE**

Attendance and timeliness are important aspects of professional behavior. Students must report to all classes, laboratories, seminars, call-back days, clinical sites, and other scheduled activities on time. Timely return from designated breaks is required. Students must return messages from program staff, faculty, clinical preceptors, and clinical sites in a timely manner (i.e., in less than 24 hours). Students must submit all required assignments and forms on or before the designated date, and/or time, that they are due. In formal classroom and clinical situations, students should address faculty and lecturers using the appropriate form of address (Professor/Doctor). Under no circumstances are children allowed in the classrooms during formal lectures.

**CRIMINAL BACKGROUND CHECKS**

Candidates for admission must satisfy a Level One criminal background check before being accepted to the program. This information will be maintained in each student’s Verify Student account. It should be noted that some clinical sites may require updating of the criminal background check prior to beginning a clinical rotation at that site. Policies of the clinical site supersede program policies while the student is engaged in clinical training at that site.

**PROFESSIONAL DEVELOPMENT ASSESSMENT TOOL**

The professional conduct of physician assistant students is evaluated on an on-going basis throughout the didactic and clinical years of the program. Violations of standards of conduct are subject to disciplinary actions administered by the university, and by the program.

As a PA student, you are expected to achieve the highest level of professionalism. The Professional Development Assessment Tool (PDAT) (see Appendix D) is an example of an assessment tool that will be used to determine if you have achieved professional competency to graduate and practice as a physician assistant. This instrument is completed at the end of each trimester by your faculty advisor and upon completion of the program.

If there are issues regarding professional behaviors that occur during a trimester, your advisor and/or the Program Director will request a meeting with you to discuss specific concerns. The PDAT will be used to document such behaviors and will remain in the student file for the remainder of the academic year. If the behavior does not improve, the student can be subject to reprimand, disciplinary action, and/or dismissal.
STUDENT CONDUCT IN CLINICAL FACILITIES

Students enrolled in the MSPAS program are expected to conduct themselves in a professional manner at all times. The criteria for evaluating professional performance include, but are not limited to, demonstrating professional competencies and skills; adhering to program and facility policies; displaying sensitivity to patients’ and community needs; demonstrating an ability to relate appropriately to peers and other members of the health care team; displaying a positive attitude; maintaining regular and punctual attendance; and maintaining acceptable physical appearance.

CONCLUSION

The requirements for professional performance have been established to protect the rights of patients and communities and to foster the team concept in the delivery of health care. Moreover, professionalism is an integral component of success as a health care provider and should be an ultimate goal of every student striving for success.

CURRICULUM AND ACADEMIC POLICIES

STANDARD B1.02 The curriculum must include core knowledge about established and evolving biomedical and clinical sciences and the application of this knowledge to patient care.

STANDARD B1.03 The curriculum must be of sufficient breadth and depth to prepare the student for the clinical practice of medicine.

STANDARD B1.04 The curriculum design must reflect sequencing that enables students to develop the competencies necessary for current and evolving clinical practice.

PROFESSIONAL PHASE CURRICULUM

The courses offered by the MSPAS program have been specifically designed and sequenced to prepare students to administer appropriate health care to patients. According to the ARC-PA 4th Edition Standards, the program curriculum should prepare students “to provide patient centered care and collegially work in Physician-PA teams in an inter-professional team environment. The curriculum establishes a strong foundation in health information technology and evidence-based medicine and emphasizes the importance of remaining current with the continually changing nature of clinical practice.”

Further, according to the ARC-PA 4th Edition Standards, the professional curriculum for PA education should include, “applied medical, behavioral and social sciences; patient assessment and clinical medicine; supervised clinical practice; and health policy and professional practice issues.”

In accordance with the ARC-PA Standards and with the desire to graduate competent healthcare practitioners who are capable of delivering high quality health care, rigorous academic standards
have been established for continued matriculation in the MSPAS program. Students are expected to complete all course assignments as outlined in the individual course syllabus and to meet the university’s academic standards as outlined in this manual. Students will be given updates to these standards as changes or revisions occur.

The following curriculum is sequential and is expected to be taken in the order listed.

**Year I Trimester I (14 credits)**

**PHAS 501 Introduction to the PA Profession (1 credit)**
This course explores the history of the Physician Assistant (PA) profession and current trends affecting the profession. Students will gain insight into professional ethics and conduct as well as the role of a PA as a healthcare provider. Students also will be informed of professional organizations, program accreditation, employment considerations and professional liability issues.

**PHAS 502C History and Physical Examination Skills (4 credits)**
This course introduces students to the skills of conducting a proper patient medical history and focused and multisystem physical examination. Students will incorporate the knowledge of body system anatomy and physiology with proper use of diagnostic equipment in the performance of a complete physical examination.

**PHAS 504 Principles of Clinical Pharmacology (1 credit)**
This course introduces students to the concepts of pharmacodynamics, pharmacokinetics and pharmacotherapeutics. Principles of the use of pharmacotherapeutics will be explored through lecture and interactive exercise. Focus will be placed on the enhancement of patient care in the clinical setting.

**RELT 510 Identity and Mission in Faith-Based Healthcare (2 credits)**
This course addresses the mission and practices of faith-based healthcare. A wide range of assignments and readings, biblical and elsewhere, provide the health care provider in training with a broader understanding of the spiritual dimensions of healthcare. Topics include human identity as “the image of God” and “child of God”, spirituality across faith traditions, compassionate whole person care, and aspects of bioethics related to human dignity, autonomy and beneficence.

**PHAS 515C Gross Anatomy (6 credits)**
This course prepares the primary care physician assistant student for pathophysiologic and clinical medicine courses by providing advanced study in gross human anatomy. Cadaveric dissection provides a structured, organ system approach to basic science and medical principles as applied to this clinical-based physician assistant curriculum. This course includes classroom lectures with clinically directed, focused laboratory activities to further enhance a student’s knowledge base in gross human anatomy.
Year I Trimester II (16 credits)

PHAS 505 Patient Assessment I (1 credit)
This is the first of a series of courses designed to provide hands-on experience that allows the physician assistant student the opportunity to practice history and physical exam skills and apply clinical decision-making skills. Practice in the use of pertinent diagnostic equipment will be incorporated. Clinical laboratory sessions will be based on an ongoing patient case study. The labs will provide students with the opportunity to perform complete and focused history and physical evaluations, develop differential diagnosis and prepare treatment plans for a patient’s various illnesses, and expand clinical assessment skills, as based upon disease and conditions taught during PHAS 512, Clinical Medicine I.

PHAS 512 Clinical Medicine I (7 credits)
This course is designed to provide the primary care physician assistant student with the essentials of assessment, diagnosis, and management of the adult patient. Objectives of this course include dissemination and knowledge-building concerning pathology of disease by organ system and medical specialty. Relevant review of laboratory and radiology interpretation will also be utilized in discussion and presentation. Topics include diseases and conditions pertinent to dermatology, ophthalmology, otolaryngology, pulmonology, cardiovascular, gastroenterology and genitourinary systems.

PHAS 520 Patient-Centered Healthcare I (2 credits)
In this course, students will explore healthcare delivery from a patient-centered perspective. Students will learn to account for social, ethnic, and religious sensitivities in the development, evaluation, and implementation of therapeutic goals. Strategies for patient education, counseling, and preventive measures will be weighed regarding the areas of diversity and healthcare delivery to these populations.

PHAS 522 Pathophysiology I (2 credits)
Prerequisites: PHAS 522
Students will learn in depth concepts of physiology as they relate to the etiology of disease. Students will learn principles of multisystem function and dysfunction at the cellular and molecular levels, especially as they relate to homeostatic function.

PHAS 524 Clinical Pharmacology I (2 credits)
Prerequisites: PHAS 524
Students will build on knowledge obtained in PHAS 504, Principles of Clinical Pharmacology, in deepening their understanding of the application of pharmacotherapeutics to disease processes. The use of pharmacological agents to treat a variety of conditions will be addressed, including mechanism of action, drug categories, drug classifications, drug-drug interactions, indications, and contraindications. Focus will continue to be placed in the interpretation of medical literature using evidence-based, best practices.

PHAS 545 Healthcare Disparities I (2 credits)
Students will explore the role of genetics in the etiology of disease, susceptibility to disease and management of disease. Students will learn effective methods to uncover a patient’s
genetic predisposition for disease development and potential interventions that will facilitate the patient’s adaptation to disease or increased risk of disease. This course gives the physician assistant student a foundational basis from which to study human genetics. In addition, techniques and resources necessary to promote patient understanding and counseling will be incorporated into the students practice. Family planning and risk assessment tools will be described.

**Year I Trimester III (16 credits)**

**PHAS 506 Patient Assessment II (1 credits)**
Prerequisites: PHAS 505
Students will build on knowledge and skills learned in PHAS 505 Patient Assessment I, to perform patient medical histories and physical examinations. Students will participate in case-based assessments of patients. Continued instruction and practice in the use of pertinent diagnostic equipment will be incorporated. This course is designed to complement the organ systems, conditions, and diseases studied during the PHAS 513 Clinical Medicine II and PHAS 514 Clinical Medicine III and the PHAS 560 Healthcare Disparities course.

**PHAS 513 Clinical Medicine II (6 credits)**
Prerequisites: PHAS 512
This course will comprise further system evaluation regarding disease processes and their manifestations. Using lectures and interactive exercises, students will add to the fund of knowledge acquired in PHAS 512 Clinical Medicine I. Relevant review of laboratory and radiology interpretation will also be utilized in discussion and presentation. Topics will include studies of hematology, oncology, infectious diseases, obstetrics, gynecology, neurology, orthopedics, rheumatology, and endocrinology.

**PHAS 521 Patient-Centered Health Care II (2 credits)**
Prerequisites: PHAS 520
Students will continue their study of concepts learned in PHAS 520 to deepen their understanding of ethical and moral imperatives in healthcare. Considerations of risk management, medico-legal issues, patient informed consent and confidentiality will be explored. Students will explore the impact of healthcare policy and socioeconomic status on decision-making and healthcare delivery.

**PHAS 532 Pathophysiology II (2 credits)**
Prerequisites: PHAS 522
Students will build on knowledge and concepts obtained in PHAS 522, Pathophysiology I, and will continue to study about the principles of multisystem function and dysfunction at the cellular and molecular levels. This study will culminate in a better understanding of the pathophysiologic processes of the human body.

**PHAS 534 Clinical Pharmacology II (2 credits)**
Prerequisites: PHAS 505, PHAS 512, PHAS 522, and PHAS 524
As the last course in a three-course sequence, students will continue to build on knowledge and skills obtained in PHAS 504, Principles of Clinical Pharmacology, and PHAS 524, Clinical
Pharmacology I, in deepening their understanding of the application of pharmacotherapeutics to disease processes. The use of pharmacological agents to treat a variety of conditions will continue to be addressed, including mechanism of action, drug categories, drug classifications, drug-drug interactions, indications, and contraindications. Issues concerning the specific patient populations of pediatrics and geriatrics will be emphasized. Interpretation of medical literature will use evidence-based medicine and best practices.

**PHAS 564 Healthcare Disparities I (3 credits)**
In this course, students will learn how to evaluate and care for the pediatric patient, gaining an understanding of diseases of this population with an emphasis on prevention, presentation, differential diagnosis, and treatment. This course includes illnesses specific to the newborn through the adolescent, including developmental milestones and immunization schedules. Students will also study evaluation and care issues specific to women’s health and the geriatric population. Diverse and unique issues affecting patients in rural and underserved populations will be explored.

**Year I Trimester IV (17 credits)**

**PHAS 514 Clinical Medicine III (5 credits)**
Prerequisites: PHAS 512, PHAS 513
Students will continue their study of disease processes as it relates to specific organ systems. Utilizing principles of advanced anatomy and pathophysiology, students explore how disease processes can disrupt normal organ systems function while utilizing best practice to determine origin and treatment modalities. Students will study conditions and diseases of behavioral health/psychiatry, as well as discuss topics related to preventive and alternative medicine. In addition, this course will provide the student with the background knowledge to enter the field of surgery, including the essentials of assessment and management of the surgical patient.

**PHAS 535 Clinical Research Methods (2 credits)**
Students will learn to evaluate current medical literature to determine validity based on statistical and clinical outcomes. Emphasis will be placed on the use, appropriateness, and understanding of common biostatistics methods and epidemiologic approaches employed by the health care professions, to form conclusions about empirical data in medicine and patient care, as well as those used in the surveillance and investigation of health-related states or events.

**PHAS 540C Clinical Correlations (4 credits)**
Students will utilize the various concepts of patient evaluation and care. Analytical reasoning, system disease processes, and diagnostic methods in case-based scenarios combine to form differential diagnoses, final diagnosis, and therapeutic treatment plans. Discussion groups, patient simulation and various laboratory procedures will be employed to prepare students for real world experiences in medical practice.
PHAS 550 Emergency Medicine (2 credits)
Students will become familiar with cases which commonly present to the emergency departments. Students will learn to identify illness, trauma, and best practice for stabilization of these presentations. Case-based scenarios and patient simulations will also be utilized.

PHAS 570C Medical Procedures (3 credits)
In this lab-intensive course, students will learn skills and techniques in the treatment of patients in a variety of settings. Suturing, splinting, wound care, intravenous and intraosseous insertions, nasogastric intubation and Foley catheter insertions will be demonstrated and practiced. Students will also be introduced to pre-operative, intra-operative, and post-operative care, and to minor surgical procedures.

PHAS 599 Clinical Orientation (1 credit)
This course is designed to provide students with the information necessary to make their transition to clinical rotations a successful and rewarding experience. Students will learn about professionalism in the clinical setting, patient confidentiality, and HIPAA and OSHA requirements. Topics will also include how to prevent medical errors and the use of electronic medical record systems. Working together as part of an interdisciplinary team in healthcare delivery will be emphasized.

Year II Trimester I (17 credits)

PHAS 600 Clinical Rotation 1 (4 credits)

PHAS 610 Clinical Rotation 2 (4 credits)

PHAS 661 Clinical Seminar I (4 credits)

PHAS 615 Clinical Rotation 3 (4 credits)

Year II Trimester II (16 credits)

PHAS 620 Clinical Rotation 4 (4 credits)

PHAS 625 Clinical Rotation 5 (4 credits)

PHAS 630 Clinical Rotation 6 (4 credits)

PHAS 681 Clinical Seminar II (3 credits)

RELP 610 Role Fidelity (1 credit)

Year II Trimester III (12 credits)

PHAS 691 Clinical Seminar III (4 credit)
PHAS 635 Clinical Rotation 7 (4 credits)

PHAS 645 Clinical Rotation 8 (4 credits)

Clinical Rotation Descriptions
Supervised clinical practice is paramount, as it becomes the primary focus of program Year II. By the completion of the program, each student will have completed clinical rotations in primary care, internal medicine, pediatrics, women’s health, emergency medicine, general surgery, and behavioral health/psychiatry. In addition, students will have completed two clinical elective rotations in the medical field of their interest, appreciating numerous opportunities to care for patient populations in underserved areas. The ADU PA program Clinical Director assigns all students to their respective clinical rotations. Rotation assignment and order of focus or specialty is predicated on preceptor and/or clinical site availability.

Primary Care Clinical Rotation
This 6-week clinical rotation will focus on primary care medicine. This rotation may include family practice and rural healthcare settings. The student will learn about evaluation, diagnosis and therapeutic planning related to a variety of acute and chronic illnesses and injuries. Students will develop their skills in dealing with patients and patient education.

Internal Medicine Clinical Rotation
This 6-week clinical rotation focuses on the practice of internal medicine. Students will have the opportunity to deal with a variety of complex adult acute and chronic diseases and discover best practice methods for diagnosis and treatment of these issues.

Pediatric Clinical Rotation
This 6-week rotation will focus on pediatric patients. Students will learn about this specialty of medical practice and how to differentiate presentations in the pediatric population from those in an adult population.

Women’s Health Clinical Rotation
This 6-week clinical rotation exposes students to the practice of women’s health. Students will learn about evaluation and treatment of a variety of gynecologic and obstetrical problems as well as other issues which are specific to women.

Emergency Medicine Clinical Rotation
In this 6-week rotation, students will experience a wide variety of clinical presentations common in emergency medicine practice. Students will learn methods for determining critical versus noncritical presentations and methods of patient stabilization. Students will have the opportunity to apply many of the procedures and techniques learned in their medical procedures course.

General Surgery Clinical Rotation
This 6-week rotation introduces students to practical concepts and principles in surgery. The students will have the opportunity to interact with surgeons in a variety of surgical cases and to explore a range of surgical therapeutics.
Behavioral Health/Psychiatry Clinical Rotation
In this 6-week rotation, students will have the opportunity to participate in the evaluation and treatment of patients with a variety of behavioral and psychiatric conditions. Students will gain knowledge about the intricacies of psychiatric illness through active involvement in the diagnosis and management of patients.

Clinical Elective Rotation I
This 6-week rotation is structured to provide the student with clinical experience in the primary care area of personal interest. The program reserves the right to design an individualized curriculum for the student to provide enhancement of knowledge and to facilitate student performance at a higher level of supervised practice.

Clinical Elective Rotation II
Students will participate in a 6-week rotation in a medical specialty or subspecialty of their personal interest. Students in good standing will also have the opportunity to participate in a medical mission field project that will be arranged through the University. For this rotation, the program will design an individualized curriculum to ensure a safe and positive learning experience.

ACADEMIC PERFORMANCE STANDARDS

STANDARD C3.03 The program must monitor and document the progress of each student in a manner that promptly identifies deficiencies in knowledge or skills and establishes means for remediation.

Preparing for a career in the health sciences is a rigorous undertaking. Practitioners are expected to possess not only excellent cognitive and technical clinical skills, but also to practice according to the highest ethical and professional standards. Preparation for meeting these high standards begins during the student’s education. Some students may occasionally experience academic difficulties. Such difficulties are best addressed early, before they grow to unmanageable proportions.

The utilization of sound judgment is a prerequisite of every successful health care provider. Students will be expected to exercise sound academic judgment and seek assistance when necessary. Students should consult with course instructors, faculty advisors, and/or the Program Director as soon as a difficulty becomes apparent.

Each student will be assigned a faculty advisor at the start of the program. The faculty advisor serves as a critical student resource for program related information, academic counseling/advisement, and as overseer of each advisee’s academic progress. Students will be required to meet with their faculty advisor each midterm and at the completion of each trimester to assure all academic progression requirements are being successfully met. Your faculty advisor will file a Faculty Advisor Midterm Evaluation Form (Appendix E) for each of their
advisees. Faculty advisors may also require more frequent meetings with a student as they deem necessary to assure that adequate academic progress is being maintained.

The Progression Requirement for Advancement from Didactic to Clinical Year:

Cumulative GPA of ≥3.0 (please refer to Academic Standards and Policies Section 7d)
1. Includes professionalism grade within each course
2. Professionalism evaluated using the Professionalism Assessment Development Tool (PADT) in appendix D.

Failure to complete the requirement will result in dismissal from the program.

**Academic Standards and Policies**

1. All students must maintain a cumulative GPA of 3.0 or better to remain in good academic standing in the program.
2. Students who fail any didactic year course are subject to dismissal from the program.
3. Students who fail a clinical rotation will be afforded one opportunity to repeat that rotation. When possible, the student will be required to repeat the failed rotation as their next clinical rotation but at a different clinical site. The Clinical Director will determine all specifics regarding the repeated clinical rotation and all requirements for successful completion and program progression. It should also be noted that, necessity to repeat a clinical rotation will likely result in the delay of the student graduating from the program with their respective cohort. Students who have repeated a clinical rotation will most often remain for an additional 6-week rotation after their cohort have completed the program to afford the student’s ability to complete all programmatic requirements for successful graduation. A student is prohibited from repeating more than one clinical rotation.
4. The academic standing of each student will be reviewed at the end of each trimester.
5. Students whose academic status is not consistent with program/course expectations will be required to meet with their faculty advisor. The student may then be referred to the program director for determination of the student’s ability to continue in the program.
6. Violation of professionalism standards and/or Program or University Policies, in any way, may be subject to reprimand, or more serious action, depending on the severity of the violation.
7. Didactic Year: Students receiving grades <75% on any exam or assignment, or who are not compliant with the professionalism requirements outlined in each course syllabus, will be expected to meet with the course instructor or their faculty advisor at the earliest possible opportunity. The student will be expected, in conjunction with their faculty advisor, to develop a learning contract (Appendix F).
   a. The learning contract requires the student to actively participate in the identification of the suspected causative issue, the corrective plan development, the development of the goals/objectives of the corrective plan, and the time frame in which the plan will be
reevaluated for successful completion and reestablishment of satisfactory academic progression.

b. The faculty advisor reserves the right to require a series of corrective action plans during any term, whether in one course or multiple courses, as deemed necessary to affect the best possible opportunity to achieve successful academic progression.

c. At the end of the term, the student’s overall academic progress will be evaluated by the faculty advisor and may be referred to the program director if deemed to be unsatisfactory.

d. A trimester grade of $\geq 3.0$ is expected throughout. The trimester GPA may drop ONCE below a 3.0 but no less than 2.85. All subsequent trimesters, before and after, must have a trimester grade of $\geq 3.0$. If a trimester grade is less than 2.85 or, if a second trimester cumulative grade is less than 3.0, these are deemed grounds for dismissal from the program.

e. Remediation: Student remediation, relative to courses and the overall program, is addressed as a rolling process on an individual basis. Routine monitoring of student progress is conducted by course instructors and program faculty on a weekly basis. Remediation is accomplished through process described throughout this section. Academic deceleration is not offered in this program therefore it is the express intent of the remediation process that all student’s progress simultaneously in an academically successful manner throughout the duration of the program.

f. A student who has withdrawn or been dismissed from the program, may request the opportunity to participate in an external remediation process. The student will be assigned and program faculty advisor who will review the student’s performance in the program. Based on the faculty advisor’s evaluation, a series of remedial steps will be given to the student in writing. This plan will be designed with the goal of strengthening the student’s identified weaknesses to offer the best possible chance to be successful in the program. The time frame of the external remediation plan will be subject to the stipulated plan and the final approval of the Program Director. Upon satisfactory completion of the remedial plan, the student is eligible to reapply to the program and special note will be taken in the evaluation of candidacy for admission.

8. Life Event: If a student has been maintaining satisfactory academic progress and experiences significant academic deterioration secondary to an unavoidable life event, the student must notify the Program Director. The Program Director reserves the right to evaluate these instances on a case by case basis.

a. Didactic Year: If an unavoidable life event occurs at any point during a didactic trimester, the student may be offered the opportunity to return at the beginning of the following didactic year as a new student.

b. Clinical Year: If an unavoidable life event occurs during a clinical trimester, the student may be afforded the opportunity to return within 3 months of the same clinical year to complete the requirements for successful graduation from the program. If the student is unable to return in the allotted time, they will be offered the opportunity to return at the beginning of the next year as a new student.
9. Student Test Self Analysis: If a student scores below 75% on any test in the didactic year, he/she must self-analyze the test using the “Test Self-Analysis” form (Appendix H). The test will be reviewed with the faculty member teaching that class to better understand the student’s errors. The student’s faculty advisor will be notified and will be forwarded a copy of the Test Self Analysis form. The “Test Self-Analysis” form will remain in the student’s file as a legal document.

10. **STANDARD A3.05 Students must not substitute for or function as instructional faculty.**

   **ANNOTATION:** Students with specific prior knowledge, experiences and skills may assist faculty in didactic and laboratory sessions to share their knowledge and skills. Students are not to be the primary instructor or instructor of record for any component of the curriculum.

   Students who have an expertise in a skill may assist in the classroom/lab as additional help. They may not participate in any assessment or grading. The students must first be assessed by the faculty to determine the scope of their abilities. Primary instruction/assessment/grading will be only performed by the faculty. Any student deemed to be suffering academic difficulties secondary to their participation as a classroom/lab assistant will be required to immediately discontinue this activity.

**Completion**

Adventist University of Health Sciences will consider students for graduation with the degree of Master of Science in Physician Assistant Studies (MSPAS) when they have:

1. Met all general requirements for the MSPAS degree.
2. Completed all prescribed program curriculum successfully.
3. Completed a Capstone Project that has met or exceeds the standards of the University and the program.
4. Participated in the University Colloquium as instructed by the program.

**Program Dismissal**

Grounds for program dismissal include, but are not limited to, the following:

1. Failure to achieve and maintain academic progression standards.  
   (Please refer to Academic Standards and Policies Section 7d)
2. Lapses in professionalism*
3. Academic misconduct

*Students are subject to the policies found under the heading “Professionalism” found in this manual.
Academic Appeal Policy

1. The student should discuss the grievance with the instructor involved no later than five business days after the incident prompting the grievance.

2. The instructor must respond to the student within five business days of the appeal.

3. If the grievance is not resolved, a written statement should be submitted to the department chair no later than ten business days after the instructor’s response. The chair will then speak with the instructor involved and reply in writing to the student within five business days of receiving the student’s written statement. In departments where there is a program director, and when it is appropriate, the written statement may be submitted to that individual. The program director will respond within five business days of receipt of the statement. If the matter is not resolved, the student may appeal in writing to the department chair who will respond within five business days.

4. If a resolution has not been reached, the student may request that all materials concerning the grievance be given to the Senior Vice President for Academic Administration. This individual will then review the grievance materials and return a written decision within ten business days of their receipt. The decision of the Senior Vice President for Academic Administration is final.

Should a student have an academic grievance concerning a decision of his or her academic program, he or she should follow the appeal procedure outlined below:

1. The student should discuss the grievance with the department chair no later than five business days after the decision prompting the grievance.

2. The department chair must respond to the student within five business days of the appeal.

3. If resolution has not been reached, a written statement should be submitted to the Senior Vice President for Academic Administration no later than ten business days after the chair’s response. This individual will then speak with the department chair and reply in writing to the student within ten business days of receiving the student’s written statement. The decision of the Senior Vice President for Academic Administration is final.

Student Grievance Policy

For Student Grievance Policy please refer to the University Student Handbook page 65.

Leave of Absence

The University does not recognize leaves of absence from graduate academic programs.
**STANDARD A3.11** The program must define, publish and make readily available to faculty and students the policies and procedures for processing student grievances and allegations of harassment.

Pages 65-66 of the University’s Student Handbook provides a definition and procedure for members of the university who perceive any potential harassment:

**Sex Discrimination and Sexual Harassment**

Below is a brief summary of the Title IX policy and the Complaint Resolution Procedures. The full policy can be accessed at https://my.adu.edu/university-services/new-student-orientation-resources. If there are any discrepancies between this summary statement and the full policy, the full policy will prevail.

**Policy Statement**

Adventist University of Health Sciences (“University”) is committed to providing a learning, working, and living environment that promotes personal integrity, civility, and mutual respect in an environment free of discrimination on the basis of sex. The University considers Sex Discrimination in all its forms to be a serious offense. Sex Discrimination constitutes a violation of this policy, is unacceptable, and will not be tolerated. Sexual Harassment, whether verbal, physical, or visual, is always inconsistent with the mission and expectations of the University, and may constitute a form of Sex Discrimination and is in violation of this policy. Sexual Harassment also includes Sexual Violence/Assault. Definitions and examples of specific conduct that constitutes Sexual Harassment and Sexual Violence/Assault are set forth in the full Title IX Policy and Complaint Resolution Procedures.

**Scope**

The Title IX Policy and Complaint Resolution Procedures apply to administrators, faculty, and other University employees; students, applicants for employment, customers, third-party contractors, and all other persons that participate in the University’s educational programs and activities; this includes third-party visitors on campus (the “University Community”). The University’s prohibition on Sex Discrimination extends to all aspects of its educational programs and activities, including, but not limited to, admissions, employment, academics, athletics, housing, and student services.

**Reporting a Violation**

An inquiry or complaint shall be reported in writing to the Title IX Coordinator, Starr Bender, or the Deputy Title IX Coordinator, Karen Ordelheide (Denver Campus). The complaint should include:

1. Date(s) and time(s) of the alleged sex discrimination
2. Names of all persons involved, including possible witnesses
3. Details outlining what happened
4. Contact information for the complainant

All University employees have a duty to file a report or complaint with the Title IX Coordinator or Deputy Title IX Coordinator when they believe or receive information indicating that a member of the University Community may have been subjected to conduct that constitutes prohibited Sex Discrimination. Students are encouraged to do so. A person may also file a complaint of Sex Discrimination with the United States Department of Education’s Office for Civil Rights regarding an alleged violation of Title IX by visiting www2.ed.gov/about/offices/list/ocr/complaintintro.html or by calling 1-800-421-3481.

Investigation, Resolution, and Appeals

All complaints will be promptly and thoroughly investigated under the procedures outlined in the full Title IX Policy and Complaint Resolution Procedures, and the University will impose interim measures and take disciplinary and remedial action where appropriate. The University will endeavor to conclude its investigation within sixty (60) calendar days of receiving it. The complaint resolution procedures are designed for fairness to both the complainant and respondent and are implemented by University personnel who receive annual training on relevant issues. The complainant and the respondent will receive a copy of the written report after the investigation has concluded and a resolution has been reached, and both have the right to file an appeal with the University President within ten (10) days of receipt of the written report. The President’s decision on the appeal is final.

ACADEMIC INTEGRITY

A career in medicine requires integrity. It is expected that all students will act in recognition of, and respect for, this requirement. Medical education is stressful, and sometimes otherwise well-intentioned people are tempted to make poor decisions. If you experience such difficulty, please contact your course instructor or faculty advisor for guidance. This section contains information regarding the program and University’s expectations for academic integrity.

POLICY ON ACADEMIC HONESTY AND INTEGRITY

STANDARD B1.05 The curriculum must include instruction about intellectual honesty and appropriate academic and professional conduct.

In order to ensure that the MSPAS program graduates are competent and ethical practitioners, the faculty of the program has developed the following information regarding academic honesty and integrity. This information will be reviewed with all students entering the program during
orientation. It is the responsibility of the student to visit these policies regularly to refresh their understanding of them and to reinforce their compliance with them.

The University’s policy found on page 31 of the Student Handbook states the following:

**Academic Integrity Policy**

The commitment to high Christian principles and values expressed in ADU’s statement on ethics calls for academic integrity to be foundational to ADU in all its operations. Students are expected to adhere to the ethical and professional standards associated with their programs and academic courses. Unethical or unprofessional behavior will be treated in the same way as academic misconduct.

**Categories of Academic Misconduct**

The following categories of academic misconduct are concerned with student actions, not student intentions. Academic dishonesty includes, but is not limited to, the following actions:

**Cheating on Examinations**

Cheating is using, or attempting to use, on any type of examination or evaluation, such materials, information, notes, study aids, or other assistance not specifically authorized by the instructor.

**Clarification**

Students completing such examinations or evaluations should not look at another student’s material nor use the external aids specified above unless the instructor has specifically indicated that this will be allowed.

Students may not take examinations or evaluations in the place of another person, nor may students allow another person to take examinations or evaluations in their place. Students may not acquire unauthorized information about an examination or evaluation and may not use such information acquired by others.

**Complicity**

Complicity is assisting or attempting to assist another person in an act of academic dishonesty.

**Clarification**

Students may not allow other students to copy from their papers during any type of evaluation or examination. Students may not before a scheduled examination provide substantive information about test questions or the material to be tested unless specifically authorized by the instructor to do so. This does not apply to examinations that have been administered and returned to students in previous trimesters.
Fabrication, Forgery and Obstruction

Fabrication is using invented, counterfeited, altered, or forged information in assignments of any type. Forgery is the imitating or counterfeiting of images, documents, signatures, and the like. Obstruction is any behavior that limits the academic opportunities of other students by improperly impeding their work or their access to education resources.

Clarification

Students may not steal, change, or destroy another student’s work, nor impede the work of others by the theft, defacement, or mutilation of resources so as to deprive others of their use. Students may not access or use patient information in ways which violates Health Insurance Portability and Accountability Act (HIPAA) regulations.

Computer Misuse

Any use of computers that is disruptive, including any actions violating the ADU Students Computer Use Policy is prohibited.

Clarification

1. Students may not monitor or tamper with another person’s electronic communications.

2. Students may not use the University computer systems to engage in illegal activities including, but not limited to, accessing other computer systems, exchanging stolen information, or violating copyright agreements which involve protected materials.

Plagiarism

Plagiarism is intentionally or carelessly presenting the work of another as one’s own. Students should consult with their instructor in any situation in which the need for documentation is an issue. Students will be deemed to have plagiarized in any situation in which such work is not documented.

Clarification

Every direct quotation must be identified either by quotation marks or by appropriate indentation and must be properly acknowledged either by a parenthetical citation in the text or by a footnote or an endnote.

Material from another source paraphrased or summarized in whole or in part and in one’s own words must be properly acknowledged by a parenthetical citation in the text or by a footnote or an endnote.
Information which is gained in reading or research and which is not common professional knowledge must be properly acknowledged by a parenthetical citation in the text or by a footnote or an endnote.

**Multiple Submissions**

Multiple submissions are the presentation of the same or substantially the same work for credit in two or more courses – work submitted for academic credit at this or another institution. Multiple submissions shall not apply when prior written approval has been given by the instructor in the current course.

**Clarification**

1. Students may submit prior academic work if there is substantial new work, research, or other academic endeavor involved. Prior to the submission, the student shall disclose the use of the prior work to the instructor and receive the instructor’s permission to use it.

2. Students may submit the same or essentially the same work simultaneously in two courses with prior written permission from all faculty involved.

**Misconduct in Research Endeavors**

Misconduct in research is serious deviation from the accepted professional practices within a discipline; or in carrying out, reporting, exhibiting, or reporting creative endeavors. It does not include unintended error or honest disagreement about the interpretation of data.

**Clarification**

Students may not report data dishonestly, whether by altering data, by improperly altering data, by selectively reporting or analyzing data, or by being negligent in collecting or analyzing data. Students may not represent another person’s ideas, writing, or data as their own. Students may not conceal or otherwise fail to report misconduct involving research, professional conduct, or artistic performance of which they have knowledge.

**Misuse of Intellectual Property**

Misuse of intellectual property is the illegal use of copyright materials, trademarks, trade secrets, and intellectual property.

**Clarification**

1. Students may not violate the University’s policy concerning the fair use of copies. This policy can be found in the ADU Academic Bulletin.
Students suspected of academic misconduct, whether acknowledging involvement or not, shall be allowed to continue in the course without prejudice, pending completion of the disciplinary process. If the instructor must submit a final course grade before the case is resolved, then the student should be given an “Incomplete,” which will not affect his or her GPA.

1. An instructor or other staff member who suspects a student of academic misconduct or receives a complaint alleging misconduct that raises suspicion may consult the Office of the Senior Vice President for Academic Administration to learn whether there is any record of prior academic misconduct. The instructor will inform the student in writing within seven (7) days of discovering the misconduct. The instructor will include in the letter that he or she desires to meet with the student to discuss the allegation. The student must respond within seven (7) days from the date of the letter.

2. The instructor reviews all evidence, interviews any witnesses, meets with the student to discuss the allegation and to hear the student’s explanation. The instructor decides regarding the allegation. The student may have an ADU faculty or staff member of choice accompany him or her to the meeting with the instructor if he or she chooses.

   If the student does not respond to the notification within seven (7) days, the instructor continues with the investigation and report without the student’s input.

3. If the instructor determines that the student has not violated the policy, the student will be notified in writing within seven (7) days of meeting with the instructor whether or not the student responded.

4. If the instructor determines that the student has violated the policy, the instructor completes the Academic Dishonesty Report Form (ADRF) within five (5) days of the initial meeting with the student or from the end of the student’s seven (7) day response period. The student then has five (5) business days to respond and to attend a formal meeting with the instructor.

5. If the student fails to respond, the instructor completes the Academic Dishonesty Report Form and imposes a final academic sanction which may include referring the matter to the Senior Vice President for Academic Administration.

6. If the student responds, the student is given the ADRF and is asked to initial and sign the appropriate response. The student may have an ADU faculty or staff member of his or her choice accompany him or her to this meeting with the instructor if he or she chooses.

7. A copy of the ADRF is given to the student (if he or she responds), the Senior Vice President for Academic Administration, and the Department Chair. A copy is also given to the University Disciplinary Committee, if the matter is referred to them.

8. If the instructor takes no action within (5) five days of meeting with the student, the allegations will be considered dismissed. The disciplinary authority of the Adventist
University of Health Sciences is vested in the President, those asked by the President to act on his or her behalf, and in the committees and administrators of ADU for whom jurisdiction may be conferred for specific cases or specific areas of responsibility.

If violations of academic integrity come to light subsequent to a student’s graduation from the University, the instructor, program director, or department chair may make recommendations for disciplinary action to the Senior Vice President for Academic Administration. This action may include nullification of the degree awarded. Decisions of this nature may be appealed to the President of the University.

**Disciplinary Sanctions for Academic Misconduct**

Sanctions will be imposed according to the severity of the misconduct. Multiple sanctions may be imposed should the behavior call for the imposition of a more severe penalty. In all cases, the University reserves the right to require counseling or testing of students as deemed appropriate. Definitions of disciplinary sanctions include the following:

1. **Academic action**

   May include altering a grade or assigning a failing grade for the assignment, examination, or course.

2. **Disciplinary report**

   All academic misconduct and sanction are recorded on an Academic Dishonesty Report Form which is kept on file with the Senior Vice President for Academic Administration for the duration of the student’s attendance at the University. If academic misconduct reoccurs, the report will be taken into consideration in determining further sanctions.

3. **Restitution**

   Students are required to compensate the University or other persons for damages, injuries or losses. Failure to comply could result in suspension or dismissal.

4. **Probation**

   There may be specific restrictions or extra requirements placed on the student for a specified period. These may vary with each case and may include action not academically restrictive in nature, such as restriction from participation in University activities or other requirements. Disciplinary action should be consistent with the philosophy of providing constructive learning experiences as a part of the probation. A student may be required to meet periodically with designated persons. Any further misconduct on the student’s part during the period of probation may result in disciplinary suspension or dismissal.

5. **University suspension**
Suspension prohibits the student from attending the University. It prohibits the student from being present on specified University owned, leased or controlled property without permission for a specified period of time. Students placed on University disciplinary suspension must comply with all suspension requirements. A student seeking to attend the University after the conclusion of his or her suspension may apply for readmission to the University.

6. University dismissal

Dismissing permanently prohibits the student from attending classes at the University and permanently prohibits the student from re-enrolling at the University.

ACADEMIC SERVICES

Adventist University has a wide variety of academic resources available to students. This section highlights some of the resources most likely to be of value to you.

STANDARD A1.05 The sponsoring institution must provide academic and student health services to PA students that are equivalent to those services provided other comparable students of the institution.

ACADEMIC TUTORING

Early Alert

The Early Alert Program is offered through the Center for Academic Achievement (CAA). The program is designed to assist students in identifying personal and/or academic issues in a timely manner that may result in student harm or unsuccessful academic progression. Students of the MSPAS program will be required to meet with Professor Joyce Anderson in the CAA for 1 hour during the first trimester of the program. Satisfactory evidence of this requirement must be provided to the Academic Director by the end of the first trimester. Failure to do so may result in a negative effect on the cumulative GPA for that trimester.

Center for Academic Achievement

Please see page 17 of the University Student Handbook for a complete listing of available services.

The Center for Academic Achievement (known as the CAA) believes that students should study smarter, not harder. That's why The Center helps students in the areas of Academic Advising, Tutoring, Counseling, Coaching, and Disability Services. The CAA is also the place where students can register and sign up for various exams and tests prior to starting their
studies. For detailed information on any of the areas the Center specializes in, or to reserve a spot for a test, please call 407-303-7747, ext. 110-6413.

Tutorial Assistance

Tutoring for courses within the PA program should be arranged with the instructor of the specific course or the faculty advisor. Tutoring may be facilitated by the instructor or by a designated student assistant.

Counseling

Counseling assists students in resolving personal difficulties and in acquiring the necessary skills and resources to both succeed in the University environment and pursue productive and satisfying lives. Counseling can help clarify concerns, gain insight into self and others, and teach new ways to most effectively cope and/or resolve issues. Counseling can offer emotional support, new perspectives, and help in considering possible solutions. Other reasons to see a counselor may include academic, career direction/concerns, self-esteem issues, relationship issues, grief and loss, family, communication, stress management, anger management, and physical, sexual, or substance abuse. Counseling is free to all students, and students are encouraged to seek counseling assistance proactively. For appointments, please call 407-303-7747, ext. 110-6074 or email counseling@employee.adu.edu

Online counseling (e-Therapy) is available to both on-campus and distance students. Counseling is offered via email and real-time chat. For more information or to set up an appointment, please send an email to counseling@employee.ADU.edu. Please keep in mind that online counseling is not appropriate for all problems; students should speak to the counselor to determine if e-therapy would be a good fit.

DISABILITY SERVICES

All students with a documented disability who are seeking accommodations should contact the Office for Students with Disabilities (OSD) located in the CAA at least two weeks before the beginning of the trimester or immediately following any injury or illness. This recommendation is to ensure timely implementation of accommodations.

Information on Academic Accommodations

Faculty and staff members are required to provide reasonable accommodations to all students with disabilities who have provided appropriate documentation of the disability to the Office for Students with Disabilities (OSD). Therefore, all students requesting accommodations because of a disability should be referred to the OSD. Once the request has been made, the OSD will determine eligibility for disability-related services. Students must have a documented disability as defined by the Federal Rehabilitation Act of 1973, Section 504, and/or the Americans with Disabilities Act of 1990 (ADA).
If correct documentation has been submitted and a student qualifies for accommodation, the OSD will notify each instructor by letter. The letter from the OSD explains the accommodations necessary for that student. Please keep in mind that this information is to remain confidential and discussing accommodations with a student should be done discretely. If a student talks to a class member or another faculty member, that is his or her right, but not the right of the faculty member. All students sign a Release of Information Form so that the OSD may share the information with the necessary parties.

For each trimester, it is then the student’s responsibility to notify the OSD of his or her updated class schedule, and the OSD will, in turn, notify each instructor by letter. If a faculty member feels that he or she cannot implement all the recommended accommodations, the faculty member should contact the OSD to negotiate an acceptable alternative. The alternative will then be discussed with the student by the OSD and faculty member.

Here is the statement that will be included in your syllabus:

Students seeking accommodations must first contact the Office for Students with Disabilities (OSD) located within the Center for Academic Achievement (CAA), prior to or at the beginning of the trimester.

The student must provide the OSD the requested current, official documentation related to his or her disability. That documentation will be used to determine the type and extent of accommodation that is most reasonable and effective for that student. All forms can be found online on the CAA webpage behind the student login or within the CAA department itself.

If all forms have been completed, criteria met, and accommodations granted, the OSD will then notify each of the student's instructors of the accommodations that should be provided. The processing time for these forms is approximately two weeks.

For further information regarding Academic Accommodations, please contact the CAA.

**FINANCIAL AID**

Paying for higher education can seem scary, but it doesn’t have to be. There are a variety of scholarships, grants, and financial aid options available to make your dream of studying at Adventist University a reality. The Financial Services pages of the ADU website contain useful information including a net price calculator that can give you a rough, comparable estimate of the cost to attend Adventist University.

Financial Services
HOURS  Monday - Thursday 8:00 a.m. - 4:30 p.m.
Friday 8:00 a.m. - 3:00 p.m.
Appointments are recommended.

ADDRESS
Financial Services
Adventist University of Health Sciences
671 Winyah Drive
Orlando, Florida 32803
Phone: (407) 303-6963 or 1631
Fax: (407) 303-7680
Email: finaid@adu.edu

UNIVERSITY LIBRARY

The R.A. Williams Library is housed in the Health and Biological Sciences building on campus and is open Monday – Thursday 8 a.m. – 9 p.m. and Friday 8 a.m. – 4:30 p.m. Closed Saturday. Sunday 3 p.m. – 9 p.m.

For further information and online services go to library.adu.edu.

STUDENT HEALTH

As you progress through your formal education, it is important that you pay attention to your own health. A career in medicine is stressful, and medical providers are frequently guilty of setting a poor example for their patients. Proper nutrition, exercise and stress coping skills will contribute to your success as a student.

STANDARD A1.05 The sponsoring institution must provide academic and student health services to PA students that are equivalent to those services provided other comparable students of the institution.
STANDARD A3.09 Principal faculty, the Program Director, and the Medical Director must not participate as health care providers for students in the program.

STUDENT HEALTH SERVICES

Student Health

Student health services are not available on the campus of the University however, the adjacent Florida Hospital Orlando campus offers a full-service trauma level II facility with 24-hour emergency services. Should a student require emergent assistance they are encouraged to call 911. For routine health care issues, the student may visit any walk-in clinic or physician office of their choice. The program’s principal faculty, Program Director, and Medical Director will not participate as health care providers for students in the program.
MENTAL HEALTH AND COUNSELING

STANDARD A3.10 The program must have written policies that provide for timely access and/or referral of students to services addressing personal issues which may impact their progress in the PA program.

Counseling Center

The Center for Academic Achievement (CAA) is the primary source of counseling on the University campus. Students deemed to be experiencing conditions that may pose an immediate threat to themselves or others will be acutely referred, with escort, to the emergency department at Florida Hospital Orlando for emergent evaluation and treatment.

HEALTH INSURANCE

Students are required to obtain and maintain personal healthcare insurance throughout the duration of the program. Students may seek both routine and emergent healthcare services at a provider of their choice.

HEALTH AND IMMUNIZATION DOCUMENTATION

STANDARD A3.21 Student health records are confidential and must not be accessible to, or reviewed by, program, principal or instructional faculty, or staff except for immunization and tuberculosis screening results which may be maintained and released with written permission from the student.

STANDARD A3.07 The program must have and implement a policy on immunization of students, and such policy must be based on current Centers for Disease Control recommendations for health professionals.

Student Health Records and Immunizations

To meet the accreditation standards of the ARC-PA for the Master of Science in Physician Assistant Studies degree at Adventist University, the University has contracted with VERIFY STUDENT to store, monitor, and maintain confidential student health records. VERIFY STUDENT is a confidential student health record and document repository service. Students will be provided information on establishing an account with VERIFY STUDENT. All records regarding student health, immunizations, drug screens, required professional certifications and other similar documentation will be required to be stored here.

In addition to storing student health information, VERIFY STUDENT will keep the director of clinical education at Adventist University up-to-date with the status of all student immunizations.
Requirements include:

1. Proof of personal health insurance throughout the entire program
2. Proof of a satisfactory physical examination
3. Proof of TB tine test (positive results will require the student to receive a chest x-ray and further evaluation)
4. Proof of Hepatitis B vaccine and positive Hepatitis B Antibody test
5. Proof of MMR vaccine or immunity
6. Proof of Varicella history or vaccination
7. Proof of tetanus/diphtheria/pertussis vaccine
8. Satisfactory drug screen
9. Satisfactory Level One criminal background check
10. Proof of current AHA BLS certification

Student health records will not be released without written permission from the student. Health screening, immunizations, and/or healthcare services will not be conducted by program personnel.

INJURIES & NEEDLE STICK/BLOOD/BODILY FLUIDS CONTAMINATION PROTOCOL

STANDARD A3.08 The program must inform students of written policies addressing student exposure to infectious and environmental hazards before students undertake any educational activities that would place them at risk.

Accidents will occasionally occur in the laboratory or in the clinical setting. If a student is injured in a laboratory or classroom setting, the instructor should be notified immediately. If a student is injured at a clinical site, the clinical preceptor should be notified immediately and the student must follow that site’s protocol for dealing with injuries. In many facilities, this will require students to seek treatment in the employee health department, the occupational medicine department, or the emergency department. If the clinical site lacks these resources, treatment should be sought in the nearest emergency department.

Exposure to blood borne pathogens is a risk assumed by all healthcare providers. Students will receive training to minimize their risk during orientation. Individual clinical sites may also provide orientation sessions regarding blood borne pathogens. Observing universal precautions is one method to reduce risk.

The principle of universal precautions recognizes that any patient may be infected with microorganisms that could be transmitted to other persons. Of particular concern are the primarily blood-borne pathogens HIV (human immunodeficiency virus) and HBV (hepatitis B virus). However, body fluids other than blood, secretions, and excretions are included in universal precautions. Since infected patients may be asymptomatic, it becomes necessary to
use basic precautions with every patient. Observance of universal precautions will help to provide better protection for every staff member. Students should also familiarize themselves with the hospital/clinical sites’ specific policies regarding universal precautions.

**Universal Precautions Guidelines:**

- Act as though all patients with whom you have contact have a potentially contagious blood borne disease
- Avoid direct contact with blood, body fluids, secretions, excretions, mucous membranes, non-intact skin, and lesions □ Avoid injuries from all “sharps”
- Avoid direct contact with items, objects, and surfaces contaminated with blood, body fluids, secretions, and excretions
- Dispose of all “sharps” promptly in the appropriate special puncture resistant containers
- Dispose of all contaminated articles and materials in a safe manner prescribed by law

**In practice, using Universal Precautions also requires:**

- Washing hands frequently and thoroughly, especially if they become contaminated with blood, body fluids, secretions, and excretions.
- Depending on job duties and risk of exposure, using appropriate barriers, including gloves, gowns, aprons, caps, shoe covers, leggings, masks, goggles, face shields, and equipment such as resuscitation devices.

These barriers are to be used to protect:

A. Skin, especially non-intact skin (where there are cuts, chapping, abrasions, or any other break in the skin)
B. Mucous membranes, especially eyes, nose, and mouth

**NOTE:** These items of protective apparel, including gloves are removed after each use and are properly disposed. The same pair of gloves, etc., are NOT to be worn from one patient or activity to another.

- Students will wear protective equipment as directed by their clinical preceptor or facility protocol
- All patient specimens are bagged per facility protocol before transport to the laboratory

In the event a student is injured by a contaminated “sharp” or is exposed in any manner to blood or potentially infectious bodily fluids during their assigned clinical work, the following steps should to be followed for proper treatment and follow-up for the student.

Upon possible exposure to a blood borne pathogen:
1. For skin and wounds, wash the affected area with soap and water. Eyes and mucous membranes should be copiously flushed with water. Notify your clinical preceptor immediately.

2. Follow facility protocols regarding evaluation. Most facilities will require you to report immediately to employee health or the emergency department following exposure. Failure to follow up properly may make it difficult or impossible to obtain source patient blood in facilities in cases in which this may be possible.

3. In sites without employee health or emergency departments, or if the site protocol is unclear, proceed immediately to the nearest emergency department for assessment. In cases in which prophylactic medical treatment is indicated, it is believed to be most effective when administered as quickly as possible.

4. The treating healthcare professional will request information about your medical history, the source patient’s history (if known) and the nature of the exposure. They may request permission to draw baseline laboratory studies. They will discuss your risk of contracting a blood borne disease and the risks and benefits of prophylactic treatment. In deciding whether to receive post-exposure prophylactic treatment, students might also wish to consult with the National Clinicians Post-Exposure Prophylaxis Hotline: 888-448-4911.

5. Students should follow up as directed by their treating healthcare provider. Ongoing follow-up may take place at the initial treating facility or the student may be referred to a healthcare provider with expertise in infectious disease. The program may be able to assist the student in finding an infectious disease specialist as requested or required.

6. Since students are neither employees of Adventist University nor the clinical sites, payment for assessment and treatment is the responsibility of the student and their insurance carrier.

All students who experience an injury or exposure must complete an incident report and submit it to the Program Director as soon as possible. However, students should not delay prompt evaluation and treatment to complete paperwork.

**ABSENCE, LEAVE AND WITHDRAWAL**

**ABSENCE – GENERAL**

Physician assistant education is intensive. There is a mandatory attendance policy for all required learning experiences throughout the program. It is recognized that situations beyond your control occasionally arise, but you should make every attempt to attend all scheduled sessions.

Students should exercise sound judgment skills when making decisions regarding missing course lectures, assignments, examinations, or clinical rotations. Mild upper respiratory infections may not warrant missing course work or examinations. Weddings, family vacations, or expensive airline reservations may not be considered a valid excuse for missing an examination or requesting an alternative examination date. Unexcused absences may result in a score of zero on assignments and examinations. Make-up examinations may be offered at the discretion of the course instructor on a case-by-case basis. Make-up examinations may be given in an alternate format.
During the didactic year students are allowed **three sick days**. If a student determines that they are too ill to attend class, they must contact the department administrative assistant, Lee Ann Wetmore by 9:00am. Failure to notify the department by 9:00am will result in a subtraction of 10 points from the next exam for each course scheduled for that day. Any absence of two consecutive days or more requires a note from a health care provider regarding the illness. Friday and Monday will be considered consecutive absence. Failure to produce an acceptable note from a health care provider will result in immediate probationary status to last the remainder of the didactic year. Absence of more than the three allotted sick days without a documented medical excuse will result in immediate probationary status for the remainder of the didactic year. Any additional absence can be grounds for immediate dismissal.

Students who anticipate an absence in excess of 5 consecutive class days should consider filing a “Life Event Withdrawal” request with the Program Director, if applicable. (Refer to page 33 “Academic Standards and Policies” section 8)

During the clinical year each student will be given a two-week break during the Christmas and New Year holidays as well as an allotment of 5 days to be used for absences of any kind. The following rules apply to the use of these days:

**Anticipated Absence**

Students who know in advance that they will be absent due to events such as employment interviews and religious observances not provided for on the university calendar should clear the anticipated absence at least 30 days in advance. Time off must generally be made up within one week.

<table>
<thead>
<tr>
<th>Anticipated Absence</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Professional Year</td>
<td>Contact your faculty advisor at least 30 days in advance to discuss clearance.</td>
</tr>
<tr>
<td>Second Professional Year</td>
<td>Contact the Clinical Director and your clinical preceptor at least 30 days in advance to discuss clearance.</td>
</tr>
</tbody>
</table>

**Unanticipated Absence**

Occasionally, a student is unable to attend class or rotation due to an unexpected personal or family emergency. Documentation of the event may be required by the Program.

<table>
<thead>
<tr>

<td>Contact your faculty advisor or program secretary as soon as possible.</td>
</tr>
<tr>
<td>Second Professional Year*</td>
<td>Contact the program secretary, the Director of Clinical Education, and your clinical preceptor as soon as possible.</td>
</tr>
</tbody>
</table>
*An absence from a clinical rotation site up to two consecutive weeks will be made up during the elective clinical rotation period, with the approval of the Clinical Director. Any absence in excess of two weeks will be subject to dismissal from the program. Students absent up to two weeks in the final trimester of the program will be expected to make up the time by the end of the successive fall trimester to satisfy program completion requirements. Any student who anticipates an absence in excess of two consecutive weeks should consider filing a “Life Event Withdrawal” request with the Program Director, if applicable. (Refer to page 33 “Academic Standards and Policies” section 8)

**ABSENCE FROM EXAMINATIONS**

*STANDARD C3.01 The program must conduct frequent, objective and documented evaluations of students related to learning outcomes for both didactic and supervised clinical education components.*

Students are required to be present for examinations as scheduled. Students who are late for examinations forfeit the time allotted and will not be permitted to recover that examination time. In the event of serious personal illness/injury or the death of an immediate family member, students may be excused from course work or examinations as necessary. The program may require a written statement from a licensed physician or health care provider explaining your illness or injury. A copy of the immediate family member’s death certificate may be requested by the program as proof of the student’s absence.

**Under no circumstances will students be permitted to take an examination before the regularly scheduled examination.** In other words, there will be no “make-up” examination administered prior to the official examination date and time.

**ABSENCE FROM CLINICAL ROTATION**

Attendance at clinical sites is an essential component of a student’s education. Each student will be allotted **5 personal days** to use in case of illness, job interviews or personal activities. These days must be approved by the Clinical Director and the clinical preceptor.

Students must inform their clinical preceptors and the program when, **for any reason**, they will not be at their clinical site. Students should contact the **program secretary and the Director of Clinical Education** via phone or email; they will in turn inform the Program Director.

As graduation approaches, it is expected that students will need to schedule employment interviews. As with any other absence, these must be cleared with the clinical preceptor and the Clinical Director.

**WEATHER-RELATED EMERGENCIES**
In the event of severe weather, students should check with the ADU webpage or call the university. Students are expected to use their best judgment in deciding to travel. If the University is closed students that are on their clinical rotations should be released from their rotations. Conversely, students at a clinical site with significant adverse weather conditions must use their best judgment in consultation with their preceptors in determining their attendance at the site regardless of the University’s status. Students must notify the program of non-attendance as noted above. Every attempt must be made to make up the missed time during clinical rotations.

BEREAVEMENT

Absence from class or a rotation will be granted for the death of a first-degree relative (parent, spouse, sibling, and child) or grandparent. The student will normally be allowed three (3) business days for in-state services and four (4) days for out-of-state services. The faculty advisor and Program Director should be consulted so that a study plan can be put in place to allow the student adequate time for make-up work.

LEAVE OF ABSENCE

The university does not recognize leaves of absence from graduate academic programs.

WITHDRAWAL

It is not unusual for students to experience stress in adjusting to the rigors of physician assistant education. Students considering a withdrawal from the program should consult with their faculty advisor and/or the Program Director before initiating the withdrawal process.

A student may withdraw from the program by written request to the Program Director. It may be possible for a student who is withdrawing from the program to maintain matriculation at Adventist University. Students should consult with their faculty advisor and the University Student Handbook page 39 for further information.

COMMUNICATION

CELLULAR PHONES

Out of respect for your classmates and lecturers, please turn your cellular telephone off prior to class. This does not mean the vibrate setting, it means OFF.

EMAILS

While enrolled as a student in the program, the email address of record shall be the (first name). (last name)@my.adu.edu email address assigned upon admission to the University. It is strongly
encouraged that students check their my.adu email account at least once every 24 hours for course announcements and important information from the program and/or the University.

**EMERGENCY PHONE CALLS**

Please inform friends and family that they should contact the program Executive Assistant if an emergency should arise while class is in session. A message will be delivered to the student, as cellular telephones must be switched off while in class. Please contact Lee Ann Wetmore at 407-303-8778.

**MISCELLANEOUS POLICIES**

**EMPLOYMENT DURING THE PROGRAM**

Due to the rigors and demands of PA education, students are strongly encouraged to refrain from any outside work activities for the duration of the program. Any questions should be directed to the Program Director.

**EXAMINATION SECURITY**

It is the intent of the MSPAS program to adopt computer based examinations as frequently as possible in all courses. These examinations will require the student to bring their own laptop for the testing period. A secure web browser will be employed by the University for the delivery of these exams. Students will not be allowed to bring cell phones, books, backpacks or any other personal items into the testing area. Secured storage will be supplied. This type of security model is like the testing environment that students will experience when sitting for the National Commission on the Certification of Physician Assistants (NCCPA) Physician Assistant National Certifying Examination (PANCE). By employing a similar method of security, it is intended that students will be more familiar and comfortable with this process when they sit for the PANCE.

**HOLIDAYS**

During the first year of the program, students will observe the usual academic calendar issued by the university.

During the clinical year of the program, students will experience an irregular schedule. No student should make travel arrangements without consulting with the Clinical Director and his/her clinical preceptor.

Students are not required to attend their rotations on holidays designated at the discretion of the clinical sites. Students may request time off for bona fide religious observances, but patient
needs take priority, and there is no guarantee that such requests will be honored by a clinical site.

PART II: ADDITIONAL RESOURCES
ACCREDITATION REVIEW COMMISSION ON EDUCATION FOR THE PHYSICIAN ASSISTANT, INC. (ARC-PA)

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) is the recognized accrediting agency that protects the interests of the public and PA profession by defining
the standards for PA education and evaluating PA educational programs within the territorial United States to ensure their compliance with those standards.

The ARC-PA encourages excellence in PA education through its accreditation process, by establishing and maintaining minimum standards of quality for educational programs. It awards accreditation to programs through a peer review process that includes documentation and periodic site visit evaluation to substantiate compliance with the Accreditation Standards for Physician Assistant Education. The accreditation process is designed to encourage sound educational experimentation and innovation and to stimulate continuous self-study and improvement.

www.arc-pa.org

AMERICAN ACADEMY OF PHYSICIAN ASSISTANTS (AAPA)

The AAPA is the national professional organization of physician assistants. Its membership includes graduate and student physician assistants as well as affiliate membership for physicians and physician assistant educators. The Academy provides a wide range of services for its members, including representation before federal and state governments and health related organizations, public education, pamphlets and brochures, insurance and financial programs, and employment assistance.

As an AAPA member, you also receive multiple publications and are entitled to a membership discount for the annual spring conference. Student Physician Assistant Societies are an integral part of the AAPA and make up a body referred to as the Student Academy of the American Academy of Physician Assistants (SAAAPA). The Student Academy meets yearly at the national spring conference to elect officers and representatives. Release time to attend the national conference held in May of each year can be requested from the Program and will be allowed on a case-by-case basis.

The national organization represents you and as such deserves your support during your student years and as a graduate Physician Assistant. Support for membership in professional organizations is another benefit also routinely covered by employers.

www.aapa.org

NATIONAL COMMISSION ON CERTIFICATION OF PHYSICIAN ASSISTANTS (NCCPA)

All graduates of Physician Assistant Programs accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) are eligible to sit for the national certifying examination (PANCE) offered by the NCCPA.
Registration applications are completed during the senior year of the Physician Assistant Program. Most states require graduates to take and successfully pass the national boards to continue employment. Please refer to the link below for exam scheduling requirements.

Once certified through the NCCPA, each graduate must obtain and report 100 hours of accredited CME every two years. Recertification examinations are also required every ten years, in addition to the CME requirement.

www.nccpa.net

Florida Academy of Physician Assistants (FAPA)

The Florida Academy of Physician Assistants (FAPA) was founded in 1974 and is a state constituent chapter of the American Academy of Physician Assistants (AAPA). FAPA is the premier professional organization representing Physician Assistant practice and legislation in the State of Florida. For further information please visit their website:

www.fapaonline.org

PART III: APPENDICES

This section contains examples of forms that you will use frequently during your time with us.
APPENDIX A

Receipt and Acknowledgement
My signature on this document serves as acknowledgment of my having received and read the policies and procedures of the Master of Science in Physician Assistant Program at Adventist University of Health Sciences. I have also been advised that I am subject to the institutional policies and procedures contained within the University student handbook. I will abide by and be subject to all the aforementioned policies and procedures of the Master of Science in Physician Assistant Program and of Adventist University of Health Sciences. I further warrant that I will adhere to the student health and immunization policies as well as the policies regarding student health and professional liability insurance.

Learning Contract

1. Issue leading to the implementation of this learning contract: i.e. unsatisfactory academic progress, professionalism or other.

2. Identify the most likely causative factor(s) of this issue:
   a. 
   b. 
   c. 

3. Identify the corrective plan indicating at least 3 specific actionable items:
4. Indicate specific objectives for the plan

5. Indicate the date for plan reevaluation (date should be no more than 2 weeks from implementation of this learning contract): _________________

Faculty Advisor                                                                                             Student

APPENDIX G

Incident Report

In the event you are injured, your highest priority is prompt treatment. Do not delay seeking appropriate treatment to fill out paperwork or make notifications. Students should comply with all accident/injury protocols in place at the clinical site. In the absence of a protocol, seek treatment in the nearest emergency department.

Student Name: ____________________________ Date: ________________

Rotation: ____________________________________________

Nature of Incident

Date of Incident: ________________ Approximate Time of Incident: ________________

Did Incident Involve Possible Exposure to Blood borne Pathogen? □ No □ Yes (see below)

Description of Incident: __________________________________________________________
______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________

Actions/First Aid Taken Immediately Following Incident: ______________________________
______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________

Blood borne Pathogen Exposure

Students who are potentially exposed to blood borne pathogens should seek prompt evaluation. Evidence suggests that prophylactic medications are more likely to be effective when taken soon
after an exposure. Students should also consider contacting the National Clinicians’ Post Exposure Prophylaxis Hotline: 888-448-4911.
